

OMSimEventAction.hh

```
graph TD; A[OMSimEventAction.hh] --> B[G4UserEventAction.hh]; A --> C[string];
```

The diagram illustrates the dependencies of the header file OMSimEventAction.hh. It is shown as a central box at the top, with two arrows pointing downwards to two other boxes: G4UserEventAction.hh on the left and string on the right. This indicates that OMSimEventAction.hh includes or depends on both G4UserEventAction.hh and the standard C++ string type.

G4UserEventAction.hh
